Academic Projects

Mini Project On "APARTMENT VISITORS MANAGEMENT SYSTEM".

This project is totally based on a Web Development that involves building a frontend using HTML, CSS, and JavaScript for a login page and a dashboard. The project also includes functionality for admin users to record visitor details such as name, contact number, time, date, and the purpose of their visit.

Developed a Major "MULTIPLE OBJECT DETECTION USING YOLO".

MULTIPLE OBJECT DETECTION USING YOLO is a computer technology which relates with image processing and computer technology. There are many cases where in a given situation there is a need for faster object detection. For example, consider a traffic scenario or a case of natural disaster. In such areas, the detection of humans or specified objects becomes difficult. In such cases, there is a need for the better and quicker detection mechanism.
